

OMVL Dream XXI-N SGIS 3/4-cyl Kit, up to 160 bhp

Ref: KOMV-DRM21-34CYL-STD

Suitable for 3 or 4-cylinder, electronic, indirect, petrol-injected engines with cat.

This kit has an option to connect to the OBD socket of the vehicle to keep fuel trims correct automatically.

This kit is designed for engines producing up to 160 bhp.

Kit contents:

OMVL Dream XXI gas ECU and wiring looms

OMVL Dream XXI gas injector rail(s), nozzles and hoses

Pressure sensor

OMVL CPR Reducer/vaporiser

Changeover switch and level indicator

LPG filter/shut-off valve and vapour filter

Water Ts, hose and clips

Vapour hose and clips

Poly pipe

Installation Guide

Software on request

You will need a laptop PC for the simple set-up procedure, and a lead (optional extra) to connect to the ECU.

The standard petrol injector looms come with solder connections - plug-in petrol injector looms are available as an extra.
